

CAL-35

Cal-35 is Calcium Carbonate based lime for correcting low pH conditions and fulfilling Calcium deficiency in soils. Calcium is a key mineral whose availability in right quantity is pivotal in building soil fertility. Its best to apply lime in late summer or early fall for next year's crop.

Use of lime is essential for all crops especially fruits, vegetables, pastures, silage, and root crops grown in light sandy or sandy loam soils. Application of lime is also an effective way of correcting Magnesium overload in soils.

PRODUCT TYPE

Granular Amendment

PRODUCT DESCRIPTION

Organic Soil Amendment
