

# LAWN MASTER 18-7-6+6CA-5S

## Chemical Composition

Component	Typical Analysis
Total Nitrogen (N)	18% Min
Phosphoric Acid (P <sub>2</sub> O <sub>5</sub> )	7% Min
Potash (K)	6% Min
Calcium (Ca)	6% Min
Sulphur (S)	5% Min
Iron (Fe)	1.6% Min
Zinc (Zn)	0.46% Min
Manganese (Mn)	0.48% Min
Organic Matter	3%

## Physical properties

Property	Typical Value
Appearance	Mix of White and Grey
Bulk density	913 kg/m <sup>3</sup> (57 lb/ft <sup>3</sup> )

## Introduction

LAWN MASTER is a heavily organic-based slow-release fertilizer for use on all types of ornamental lawns, gardens, nurseries, and greenhouses. The product is made by blending various organic and safe mineral ingredients in a fully available form, using the highest quality ingredients. Like any other ViviGro product, LAWN MASTER is free of fillers. LAWN MASTER can be used as a sustainable fertilizer because of its unique nitrogen (N) stabilization process and heavy organic base, which constitutes a wide array of trace minerals needed to maintain top-quality turf and gardens. Its unique formulation not only provides complete nutrients to the crops during the full crop season. It also helps in building the soil structure and breaking down the organic matter into available nutrients.

## Suggested application rates & method

For best results, use LAWN MASTER as prescribed below:

- Apply 10 lbs. (4.5 kg) of LAWN MASTER for every 1500-2500 sq ft based on the health of the turf or garden.
- In the case of good soils for gardens, broadcast LAWN MASTER 2-3 times during the growing season.
- In cases of extremely light soils, reduce dose and increase frequency to once a month using half of the above recommended dose.
- In cases of weak soils, POSEIDON or ANCHOR 0-0-2 can also be used at 1.5 litres / 1000 sq ft, 2-3 times a year, along with LAWN MASTER using a hose end applicator. This will serve as a general supplement to boost soil health.

## Special notes

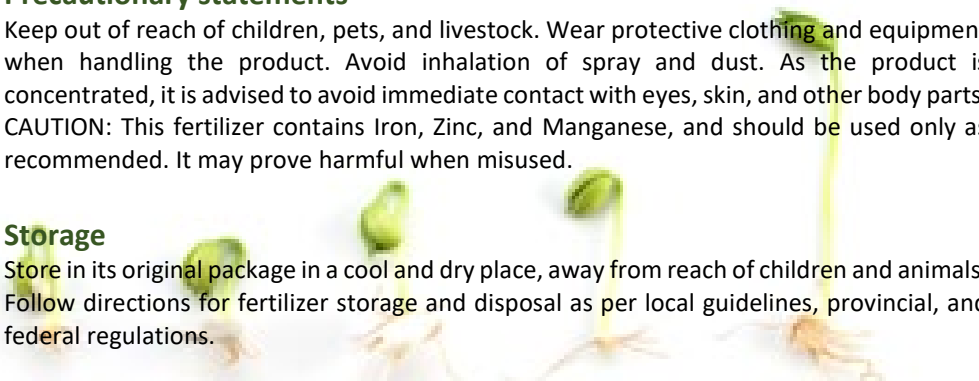

- Apply LAWN MASTER by spreading evenly and avoid over application.
- Use in accordance with the recommendations of a qualified individual or institution or according to an approved nutrient management plan.

## Precautionary statements

Keep out of reach of children, pets, and livestock. Wear protective clothing and equipment when handling the product. Avoid inhalation of spray and dust. As the product is concentrated, it is advised to avoid immediate contact with eyes, skin, and other body parts. CAUTION: This fertilizer contains Iron, Zinc, and Manganese, and should be used only as recommended. It may prove harmful when misused.

## Storage

Store in its original package in a cool and dry place, away from reach of children and animals. Follow directions for fertilizer storage and disposal as per local guidelines, provincial, and federal regulations.

## Available sizes

10kg, 25kg, 1000 kg.
