SULPHATE OF POTASH 0-0-50

Product Type: Granular Straight

Chemical composition

Component	Guaranteed Analysis (%)
Total Nitrogen (N)	0%
Total Phosphoric acid (P ₂ O ₅)	0%(min)
Available Phosphoric acid (P ₂ O ₅)	0% (min)
Soluble Potash (K ₂ O)	50% (min)
Sulphur (S)	17 %(min)
Chloride	0.5% max
Insoluble(s)	0.1% max

Physical Properties

Property	Typical Value
Appearance	Beige/Grey
Solubility	Water Soluble
Bulk Density	60-80 lb/ft ³ [960-1280 Kg/m ³]
Angle of Repose	30°

Available sizes: 25 Kg, 1133 Kg (2500lbs), Bulk

Introduction

Sulphate of Potash is a good source of potash and sulphur. Unlike other sources of Potash, this is free of chloride-based salts (low salt index). It is ideal for use where potash content is in less than required. In case of soils which are saline containing higher amount of chloride levels, SOP is preferred choice for potash. It stimulates the growth of strong stems and enhances disease resistance ability by promoting thickness of the outer cell walls. Appropriate applications can reduce moisture loss from growing plants and help in drought resistance. It also improves colour, flavour and storing quality of fruit and vegetables. It is useful in furrow or broadcast applications for agricultural use.

Suggested application rates & method

Use in accordance with the recommendations of a qualified individual or institution or according to an approved nutrient management plan.

Special Notes

Avoid using in low pH conditions of 5 or less without consultation.

Precautionary statements

Exposure may cause irritation to skin, eyes and respiratory tract. Do not breathe dust. Provide appropriate exhaust ventilation at places where dust is formed. Wear protective dust mask and eye protection. Wash skin thoroughly after handling.

Storage

Store it in its original package in a cool and dry place while keeping it away from sunlight. Follow directions for fertilizer storage and disposal as per local guidelines, provincial, and federal regulations.

Organic statements

Approved for use in organic agriculture by Pro-Cert. Products may also be restricted by usage annotations (listed on the ViviGro Certificate) and must be followed when applying the substance as part of an Organic System Plan.
